In the article "Validation of the Spanish version for the singing voice handicap index (SVHI)" (Acta Otorrinolaringol Esp. 2010;61:247-54), the following errors have been found:

- Where it states: "Regarding the SVHI-10 validated in English, it only differed in 2 items from that proposed above (1, 6, 7, 10, 15, 17, 18, 29, 31 and 32)", it should say: "With respect to the SVHI-10 validated in English, it coincided with only 3 items from that proposed above (1,3,11,15,16,18,23,24,28,31)."
- Where it states: "Both questionnaires, the original SVHI-10 and the SVHI-10 derived from the Spanish version, share 8 of the 10 items that integrate them..." it should say "Both questionnaires, the original SVHI-10 and the SVHI-10 derived from the Spanish version, share 3 of the 10 items that integrate them..."
- Table 4 on page 251 was published with errors. We reproduce the correct table below:

Table 4 Item-total correlation and reliability measurement of the 10 items in the proposed SVHI-10

Item	Item-total correlation
1	0.72
3	0.71
11	0.67
15	0.71
16	0.66
18	0.69
23	0.70
24	0.69
28	0.68
31	0.68
Cronbach α	0.917
